

Impact of CI/CD

A Better “True North”. Towards a Repeatable Reliable Process

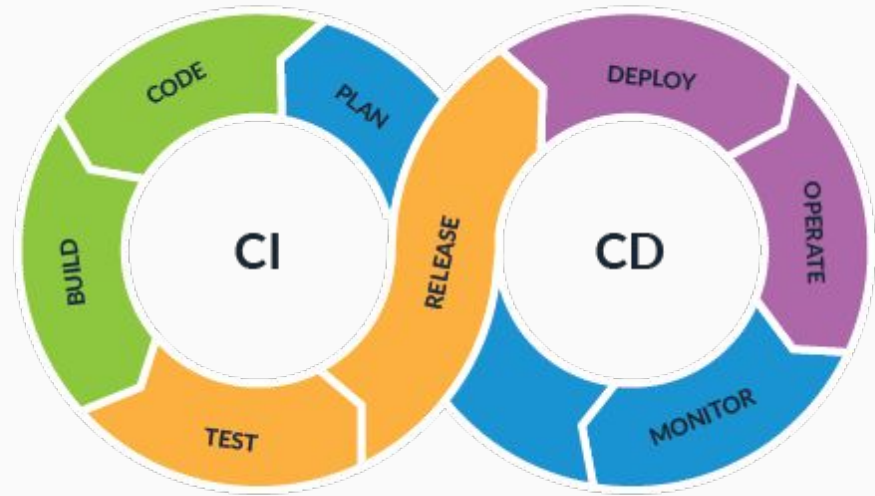

Transition

Continuous Delivery

The end goal is continuous delivery, benign able to release features in a reliable repeatable matter.

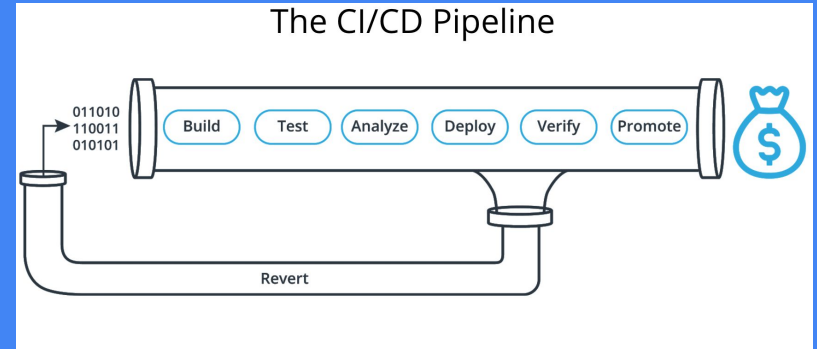

The impact

- Better Customer Experience
- Efficient Developer Productivity
- Less time to market, means more offering which in turn increase revenue

Continuous Feedback loop

Ensuring the quality of products out of the pipeline is top notch.

“Agile and DevOps are for harnessing
integration, interaction, and innovation.”

— Pearl Zhu

If we keep continuous delivery as our "eventual destination", then every small improvement in that direction will be a win.

Thanks!
